DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyamoto et al (US 6,808,755) in view of Alkhimov et al (US 5,302,414).

Miyamoto et al discloses (see Fig 1) a spray apparatus comprising a gas controller (speed increasing means 7); a gas heater (heating unit 73); a powder feeder (8); a powder preheating device (5); a temperature controller (see column 4, lines 35-52, column 10, lines 35-60 and Fig 3) for adjusting temperature of the preheating device and the gas heater and a nozzle for applying the coating powder (25). In Miyamoto's

gun (2) the heated gas is mixed with the heated powder. However, Miyamoto lacks teaching a mixing chamber for the gun. Yet, Alkhimov et al teaches a premixing chamber (37) for the coating device. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include premixing chamber to form a uniform gas and powder mixture.

With respect to claim 3, Miyamoto et al's powder transfer pipe is capable of being made from stainless steel (see also Alkhimov et al teaching a conventional transfer pipe made of stainless steel; column 15, lines 26-35).

Allowable Subject Matter

4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is an examiner's statement of reasons for allowance: see reasons for allowance described on the Non-Final action sent on 12/23/2008.

Response to Arguments

6. Applicants' arguments filed 03/23/2009 have been fully considered but they are not persuasive. Applicants argue (see page 3; paragraph 5) that the present invention is directed to a cold spray apparatus, including a powder preheating device, that can efficiently coat the particles without melting the particles. It is noted that the features upon which applicant relies (i.e., without melting the particles) are not recited in the

rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). In any event, Miyamoto et al teaches (see column 3, lines 35-38) particles flying to the object may be in a solid form (without melting). For at least the reasons described above the rejection over Miyamoto et al in view of Alkhimov et al is maintained.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
